- When creating a Bot you have to set Gas price, possible price slippage, buying or selling activation, token number and time frame. One Bot can both buy and sell at a set time frame. Using just one Bot you can determine the price changing balance at a set time frame.

The screenshot displays the 'BuySell (IRT)' interface. At the top, there are navigation links for 'WALLETS | BOTS' and a search bar. The main header includes the 'INFINITY ROCKET token launchpad platform' logo, the 'BuySell (IRT)' title, and a user profile for 'market_maker'. Below the header, there are two buttons: 'Edit Bot' and 'Delete Bot'. The interface is divided into several sections:

- IRT / BNB:** Shows a price of 0.01397 USD.
- BNB Price:** Shows a price of 226.175065 USD with a -1.01% decrease.
- Transaction Count:** Shows 204 transactions, a 174% increase vs. last day.
- 24h Transaction Fee, USD:** Shows 26.23 USD, a 164% increase vs. last day.
- Wallet:** Shows 'IRT6' with a gas price of 6 and slippage of 10.0.
- Bot Settings:** A central panel with a cyan border containing:
 - Buying status:
 - Selling status:
 - Buying amount: 15000
 - Selling amount: 20000
 - Buy timing (sec): 10
 - Sell timing (sec): 9
- PancakeSwap 24hr Volume:** Shows 160,310 USD.
- CoinMarketCap:** Shows 2,739,049 USD.

At the bottom, a table displays transaction history:

Date	Type	Tokens	BNBs	Hash	Status	Error Detail
14-06-22 12:21:00	buy	15000	0.92629835	0xef...e6d8	●	
14-06-22 12:18:10	sell	20000	1.24759823	0x71...a483	●	
14-06-22 12:18:55	sell	20000	1.25440632	0xfa...78f8	●	
14-06-22 12:18:40	sell	20000	1.28134017	0x15...18c5	●	
14-06-22 12:18:24	sell	20000	1.27427810	0xac...8323	●	
14-06-22 12:18:09	sell	20000	1.28224988	0xae...de3e	●	
14-06-22 12:17:55	sell	20000	1.29027905	0x3e...fc4d	●	

- The Bot is launched after the settings saving is complete. If buying or selling is activated, you'll see it in the main Interface (the switches will be active). The current Bot transactions, their volume, status and hash are displayed in the main field.

- Buying and selling is executed according to the settings. You can see the actions on a price chart.

The screenshot displays the 'BuySell (IRT)' interface. At the top, there are navigation links for 'WALLETS | BOTS' and a search bar. The main header includes the 'INFINITY ROCKET' logo and the text 'token launchpad platform'. Below this, there are 'Edit Bot' and 'Delete Bot' buttons. The interface is divided into several sections:

- Market Data:** Shows 'IRT / BNB' at 0.01397 USD, 'BNB Price' at 226.159967 USD with a -1.01% change, 'Transaction Count' at 206 (vs Last Day), and '24h Transaction Fee, USD' at 26.23 (vs Last Day).
- Bot Settings:** Includes 'Buying status' (on), 'Selling status' (off), 'Buying amount' (15000), 'Selling amount' (20000), 'Buy timing (sec)' (10), and 'Sell timing (sec)' (9).
- Wallet & Gas:** Shows 'Wallet IRT6', 'Gas price' (6), and 'Slippage' (10.0).
- Volume & Market Cap:** Displays 'PancakeSwap 24hr Volume' at 160,310 USD and 'CoinMarketCap' at 2,739,049 USD.
- Transaction Log:** A table at the bottom lists recent transactions with columns for Date, Type, Tokens, BNBs, Hash, Status, and Error Detail.

Date	Type	Tokens	BNBs	Hash	Status	Error Detail
14-06-22 12:21:20	buy	15000	0.94048052	0x53...2850	●	
14-06-22 12:21:10	buy	15000	0.9333491	0x7c...6cc5	●	
14-06-22 12:21:00	buy	15000	0.92629835	0xef...e6d8	●	
14-06-22 12:19:10	sell	20000	1.24759823	0x71...a483	●	
14-06-22 12:18:55	sell	20000	1.25440832	0xfa...78f8	●	
14-06-22 12:18:40	sell	20000	1.26134017	0x15...18c5	●	
14-06-22 12:18:24	sell	20000	1.27427810	0xac...8323	●	

● You can see all the changes and new transactions in the Interface, here we can see that buying continues.

- The purchases are depicted in the price chart changes. Here we can see price and volume increase.

● Now we'll activate large volume selling, buying and a smaller time frame at the same time.

- The price chart reacts and the price goes down. This is how we smoothly influence the price setting more frequent and high buying and selling.

● If you want to stop selling and keep buying, switch to off and save.

The screenshot displays the 'BuySell (IRT)' interface. At the top, there are navigation tabs for 'WALLETS' and 'BOTS', a search bar, and the user profile 'market_maker'. The main header includes the 'INFINITY ROCKET' logo and the text 'token launchpad platform'. Below this, there are 'Edit Bot' and 'Delete Bot' buttons. The interface is divided into several sections:

- Market Data:** Shows 'IRT / BNB' at 0.01431 USD, 'BNB Price' at 226.307591 USD with a 1.4% increase, 'Transaction Count' of 215 (vs Last Day), and '24h Transaction Fee, USD' of 26.09 (vs Last Day).
- Bot Configuration:** A central panel with 'Buying status' (active), 'Selling status' (inactive), 'Buying amount' of 15000, 'Selling amount' of 20000, 'Buy timing (sec)' of 5, and 'Sell timing (sec)' of 9.
- Wallet Info:** Shows 'IRT6' with a gas price of 6 and slippage of 10.0.
- Market Metrics:** 'PancakeSwap 24hr Volume' at 160,310 USD and 'CoinMarketCap' at 2,739,049 USD.
- Transaction History Table:** A table with columns: Date, Type, Tokens, BNBs, Hash, Status, and Error Detail. It lists several completed transactions.

Date	Type	Tokens	BNBs	Hash	Status	Error Detail
14-06-22 12:23:26	sell	20000	1.26385169	0x57...c085	●	
14-06-22 12:23:11	sell	20000	1.27682562	0xa8...4c43	●	
14-06-22 12:22:57	sell	20000	1.29000066	0x03...871e	●	
14-06-22 12:22:42	buy	15000	0.96006112	0x91...773e	●	
14-06-22 12:22:28	sell	20000	1.29330746	0xce...58b3	●	
14-06-22 12:22:13	buy	15000	0.96251248	0x13...3d30	●	

● In the interface we can see completed transactions and bot status. Now buying is active.

- Now we return to the settings, make the buying volume bigger and save. Before you saved the new settings the bot continues working with the previous ones.

- Large buying influences the price chart a lot. Here we can see the indicator increase.
