Market Maker Tools for DEX

For BSC BEP20 tokens on PancakeSwap

Market Maker Tools for DEX - is a program solution allowing market makers to run token movement on the DEX exchanges.

Infinity Rocket Market Maker Tools:

For BSC BEP20 tokens on PancakeSwap

- allows to manage the trading volume,
- allows to accumulate and distribute positions,
- forms support and resistance levels,
- works with numerous wallets at the same time (up to 20 bots),
- preset Bot behavior scenarios (Daily Smooth Buy Bot, Daily Smooth Sell Bot, Volume Bot, Pump Bot and others),
- allows to form a requested price chart.

Infinity Rocket Market Maker Tools

The Program allows to create a large number of trading bots for performing various market maker tasks:

- price holding,
- accumulation, distribution,
- providing necessary price impulse.

When creating a Bot you have to set Gas price, possible price slippage, buying or selling activation, token number and time frame.

One Bot can both buy and sell at a set time frame. Using just one Bot you can determine the price changing balance at a set time frame.

Sub-account management and Administrator list. You can add many employees with access to certain bots.

Market Maker Tools for DEX allows you to create the necessary token chart. See the impact of the Program.

An example of using the Program. Token 1.

Market Maker Tools for
CEX
Coming soon

Add your token to the platform, then add the wallet for this token

NB! Each new token needs to be added to the platform individually to create new bots.

Start managing your token on **Market Maker Tools**

Step 1. Add token

Step 2. Add wallet

1. Firstly,
add a token.

2. Then **add the wallet** for the token.

Add new token

Token contract address*

SUBMIT

Add a token

Type the **contract** address to add new token.

We'll show it how to do this with CAKE token as an example.

Step 1: In progress...

Step 2: Add wallet

Add new wallet to CAKE

Private key security:

- 1. The Private key will be shown only once and cannot be changed after creation.
- 2. Please do not leak the private key to avoid asset loss.

SUBMIT

Or add a wallet from another token

ADD FROM ANOTHER TOKEN

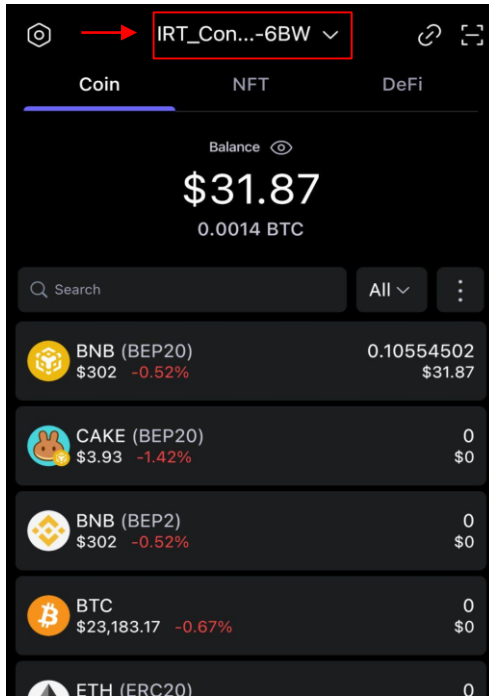

Add a wallet.

Name the wallet, add the wallet address for this token in "Address".

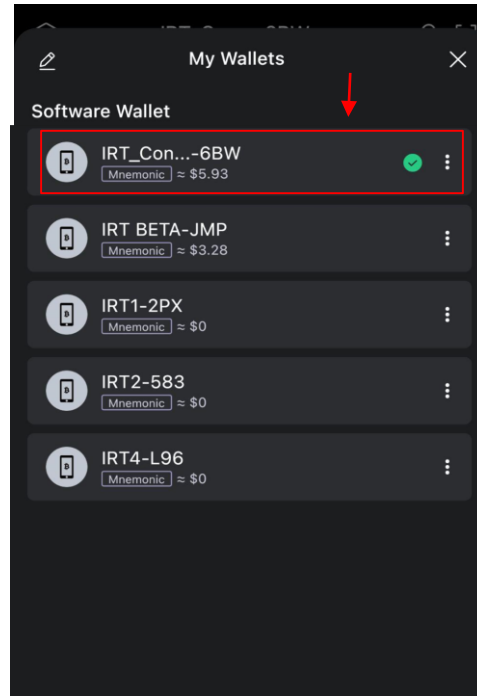

Then type the Private Key for this wallet.

*Look for the information on where to find the Private Key on the next page.

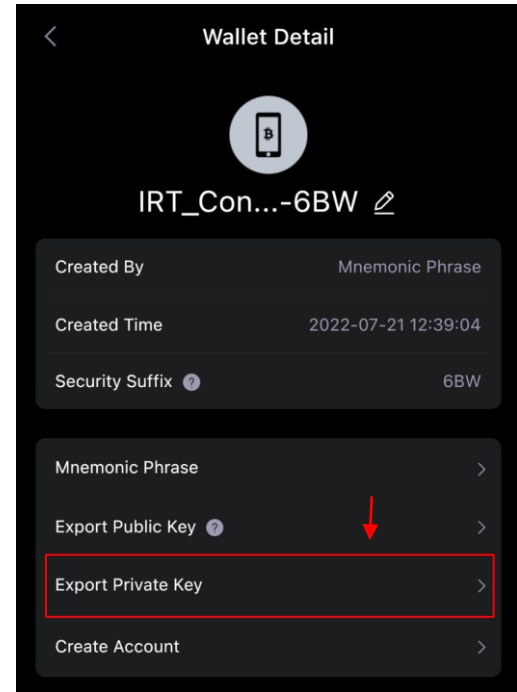

Where to find the **Private Key**?

1. Open the **wallet list** and choose the one you have activated for Cake.

2. Open the wallet settings and press **“Export Private Key”**.

3. Copy the **key** and paste it into the input box (as shown on the previous page).

The **randomizer** allows you to change the number of tokens of each transaction.

Switch on and off the activity with the button.

Input the **amount of tokens** that you want **to buy** and time (seconds) here.

The bot buys a certain amount of tokens at a set time period.

Set the **amount of tokens** and time(seconds) **to sell**.

Remember that the **exchange charges** you with fee when you sell or buy something. That is why the amount of tokens for selling should be less.
