Operation Manual

# Market Maker Tools

## for DEX

Market Maker Tools for DEX  - is a program solution allowing market makers to run token movement on the DEX exchanges.

Infinity Rocket Market Maker Tools:

- allows to manage the trading volume,
- allows to accumulate and distribute positions,
- forms support and resistance levels,
- works with a lot of wallets at the same time,
- preset Bot behavior scenarios (Daily Smooth Buy Bot, Daily Smooth Sell Bot, Volume Bot, Pump Bot and others),
- allows to form a requested price chart.

www.irocket.pro          https://t.me/irocketeng

INFINITY ROCKET
smart technologies

# Infinity Rocket Market Maker Tools

The Program allows to create a large number of trading bots for performing various market maker tasks:
- price holding,
- accumulation, distribution,
- providing necessary price impulse.

When creating a Bot you have to set Gas price, possible price slippage, buying or selling activation, token number and time frame.

One Bot can both buy and sell at a set time frame. Using just one Bot you can determine the price changing balance at a set time frame.

Sub-account management and Administrator list. You can add many employees with access to certain bots.

SELL

**Add your token** to the platform, then add the wallet for this token

NB! Each new token needs to be added to the platform individually to create new bots.

Start managing your token on **Market Maker Tools**

Step 1. Add token

Step 2. Add wallet

1. Firstly, **add a token.**

2. Then **add the wallet** for the token.

⚠️ For set up Pool Fee correctly, just **check your contract**
on https://www.dextools.io

⚠️ To change it use **Options button** on DEX APP page https://mm.irocket.pro/dex

And use it on bot settings.

LINK ETH      IRT BSC

# Add new token

Token contract address*

Network*
BASE ▾

Swap*
Uniswap V3 ▾

Pool fee %
0.05                                                    ⓘ

Specify Pool Fee % for your token for correct price
token management. Check your token correct USD
price in wallet if you change the default one.

**SUBMIT**

## Add a token

**Type the contract** address to
add new token.

Select a **Network**
and **Swap.**

⚠️ **Attention for Free Trial! 1 trial = 1 token.**
You can use only one free trial on your new account, and there are no changes after adding.

# Add new wallet to CAKE

SUBMIT

**Switch on and off** the activity with the button.

Input the **amount of tokens** that you want **to buy** and time (seconds) here.

The bot buys a certain amount of tokens at a set time period.

Set the **amount of tokens** and time (seconds) **to sell**.

Remember that the **exchange charges** you with fee when you sell or buy something. That is why the amount of tokens for selling should be less.

**Dispersion** is a random number generator for tokens. For example, if you set 100 tokens and a dispersion of 20%, the bot will buy 100 ± 0-20% of that quantity, which could be 80, 95,120, or 101 etc.
The **randomizer** allows you to change the number of tokens of each transaction.
